Hello everyone and welcome to our project!

The screenshot shows a digital display with a white background and a dark blue border. On the left, it says 'WELCOME' in blue, followed by 'AI IN THE AIR' in black, and 'eTwinning project' in a pink cloud-like shape. On the right, there is a blue robot head logo with a lightbulb, and below it, 'AI FOR AIR' in black.

Groupwork: History of AI

Some important figures who helped the development of AI between the 1940-50ies

some new AI technologies that came out between 1980-2010s

Theseus: A small robotic mouse that could navigate a simple maze and remember its course.

Perceptron Mark I: Regarded as the first artificial neural network, it could visually distinguish cards marked on the left side from those marked on the right.

TD-Gammon: This software learned to play backgammon at a high level, just below the top human players.

AlexNet: This was a pivotal early "deep learning" system - a neural network with many layers - that could recognize images of objects such as dogs and cars at near-human level.

Artificial intelligence with language and image recognition capabilities that are comparable to those of humans

Timeline: 1940, 1950, 1960, 1970, 1980, 1990, 2000, 2010, 2020, 2030, 2040, 2050

First digital computers

Global AI software market growth

some statistics about the growth and usage of AI

QR codes: a digital museum about the development of AI, a collaborative page with students' research about the history of AI, a video record of students' answers to questions.

Important Days and Events

eSafety Day

On 7th of the February 2024, we celebrated eSafety Internet Day (SID) - with the annual campaign promoting a safe digital environment for children and young people.

Visiting exhibition about AI in Belgrade

This visit, which was organized as part of the twelfth May Month of AI, took place in the City of Belgrade organized by the Ministry of Education, Science and Technological Development. The exhibition showcased the latest developments in AI, highlighting how this technology is used in everyday life and in the most diverse fields of science and economy, as well as in medicine and healthcare.

Eko rječnik
Marena Arambašić

S

SMOG - onečišćena magla. Nastaje zbog onečišćenih plinova koji izlaze iz automobila i raznih tvornica.

Šta smo
NAUČILI?

01

Obrazovanje je važno

Što više znamo, bićemo aktivniji i više ćemo se zalagati za životnu sredinu.

02

Priroda je važna

Čuvajmo je i poštujmo, jer smo deo nje. Ne prijavimo je i ne kvarimo!

03

Štednja je važna

Razumno trošimo vodu. Efikasno trošimo energiju.

04

Reciklaža je važna

Smanjimo količinu otpada. Iznova upotrebljavajmo stvari.

05

Saradnja je važna

Sami možemo mnogo, timski možemo više. Zajedno možemo obezbediti svetiju budućnost za ljude i planetu.

06

Budućnost je u našim rukama

Preduzmimo sve što je u našoj moći da pomognemo planeti Zemlji.

eTwinWorld Travel Agency

Dear Mr and Mrs Suitcase,
Greetings from Serbia! It's warm and sunny these days and we're having lots of fun.
We've visited so many historic places and taken a boat ride.
Tomorrow, we're going to visit the Devil's Tower.
The food here's delicious!
We can't wait for autumn to come to visit Kikinda, weigh the pumpkins and count the owls!
Sunny greetings :)
PS. We're sending you the photos we've taken ourselves.

Belgrade

We've visited the capital city, taken a pleasant boat ride, admired the Temple of Saint Sava, gone back in time while walking round the Fortress, seen the confluence of the Sava with the Danube, and climbed the nearby Avala Tower.

Zlatar

We've spent a weekend on Zlatar Mountain, exploring the woods, jumping over a creek, and enjoying the fresh air.
Our visit to the Uvac Special Nature Reserve was great! We admired the beautiful meanders and the griffon vultures.

Zlatibor

We've made a short stop on Zlatibor, and, believe it or not, experienced snow in spring!

by eTwinWorld Travel Agency project partners

Specialties

We've tried some of delicious Serbian food and dishes, such as proja bread, fresh cheese called kajmak, and pastry called gibanica. We liked both the cheese and poppy versions. We've even bought a jar of qjvar made of roasted peppers to take home.

Vojvodina

We've explored the northern region of Serbia as well, learned interesting things about the well-known scientist Mihajlo Pupin, admired the colourful paintings of the Slovaks, and the view from Vršac Tower left us speechless. We've even had a chance to ride horses.
By the way, did you know that there's the Amazon in Vojvodina, too?
