13:00-13:30	Presentation of work and conclusion of the seminar	
13:30	<i>LUNCH (Hotel restaurant)</i>	

## 1. WORKSHOP: *Using ICT in outdoor learning*

Using ICT sensibly can add value to outdoor learning. It makes sense when it intensifies contact with nature, enables better experience, improves the perception of natural processes or encourages group dynamics. During the workshop we'll experience how to use different ICT tools such as smartphones, GPS, camera, different applications in different outdoor learning situations.

Workshop will be held by Živa Pečavar and Irena Kokalj, Center for School and extracurricular activities.

---

## 2. WORKSHOP: AI prompt writing

Participants will get practical knowledge on how to create an input to receive a desirable response from generative AI.

Workshop will be held by red. prof. dr. Alenka Lipovec (University of Maribor).

---

## 3. WORKSHOP: How to use AI in eTwinning projects

Different AI tools will be presented and how to use them in different stages of eTwinning projects (planning, finding ideas, generating different activities, logos).

Workshop will be held by Sonja Kepe (ICT teacher in primary school Beltinci).
